

*At Cont Sub B1*

communication terminal is allowed to make a communication if a predetermined registration processing is executed. If the registration processing is not executed, then predetermined functions other than a communication function of the communication terminal are limited. Moreover, when a predetermined operation mode is set by an operation means, at least a transmission processing at a radio communication means is stopped and an execution of predetermined functions other than the radio communication processing is not restricted. Thus, when a communication terminal apparatus incorporates therein functions other than an audio reproducing function, operation of such functions can be limited properly. Moreover, when other functions such as an audio reproducing function are incorporated into a communication terminal apparatus, operations of the functions thus incorporated can be limited properly and the communication functions can be stopped properly.--

## IN THE CLAIMS

Please amend claims 1-22 by rewriting same to read as follows:

*At 2 Sub B2*

--1. (Amended) A method of controlling a communication terminal that communicates with a predetermined base station by radio waves, comprising the steps of:

enabling said radio communication to be executed when a registration processing concerning a predetermined
